

# BIO English

**POLUTION**, known for their powerful riffs and captivating rock anthems, and their distinctive blend of creativity and precision, are making a musical statement in the hard rock scene. The band has already shared stages across Europe with various international acts. The worldwide release of their albums has significantly influenced them in many ways.

**POLUTION** always stay true to themselves. Authentic, without typical (rock) pretensions, with an impressive amount of groundedness and consistency, they have been rocking national and international stages with their sound since the beginning. They have shared stages with **Shakra, Threshold, Krokus, Sodom, Jeff Scott Soto, John Coughlan (Status Quo), Sideburn, The New Black, and Eclipse** and they have toured across Switzerland, Germany, the Netherlands, Belgium, Italy, the Czech Republic and Sweden. On their previously released albums as well as live, they draw on five decades of rock music history, packing a powerful dose of **POLUTION** into their arrangements and lyrics.

The musicians from the mystical, rugged Muotathal bring all the attributes of Swiss quality to the forefront. In addition to the raw, smoky voice, the solid craftsmanship of the instrumentalists, and their fundamentally honest and powerful sound, the origins of the musicians play a significant role. The rawness of nature is deeply ingrained in the five musicians, which is reflected in their music.

**POLUTION** know what they want, and above all, what they don't want!
